it

Contribute
together

Open Source
for a more
global internet.

01

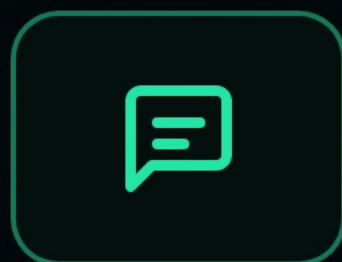

Talk Before You Code

Don't start coding yet.

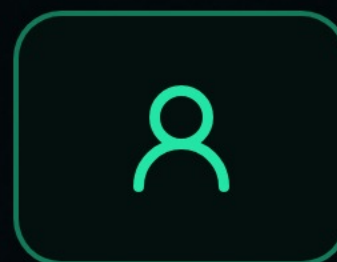

Found a bug? Have an idea? Want to build a feature?

CHECK

DISCUSS

CLAIM

CODE

- 1 Check existing issues
- 2 Find or create the relevant issue
- 3 Comment what you plan to work on
- 4 Wait for confirmation
- 5 Then start coding

Avoid duplicate work.

Keep contributions coordinated.

*From idea
to impact.*

02

Open a PR

ONE PR. ONE CLEAR CHANGE.

Keep your PR:

Focused

Solve one problem.

Keep your changes scoped to a single issue or feature.

Clear

Explain what changed and why.

Write a clear description with context, screenshots (if needed), and link the issue.

Tested

Verify your changes.

Make sure your code works as expected and doesn't break existing functionality.

Reviewable

Avoid unrelated changes.

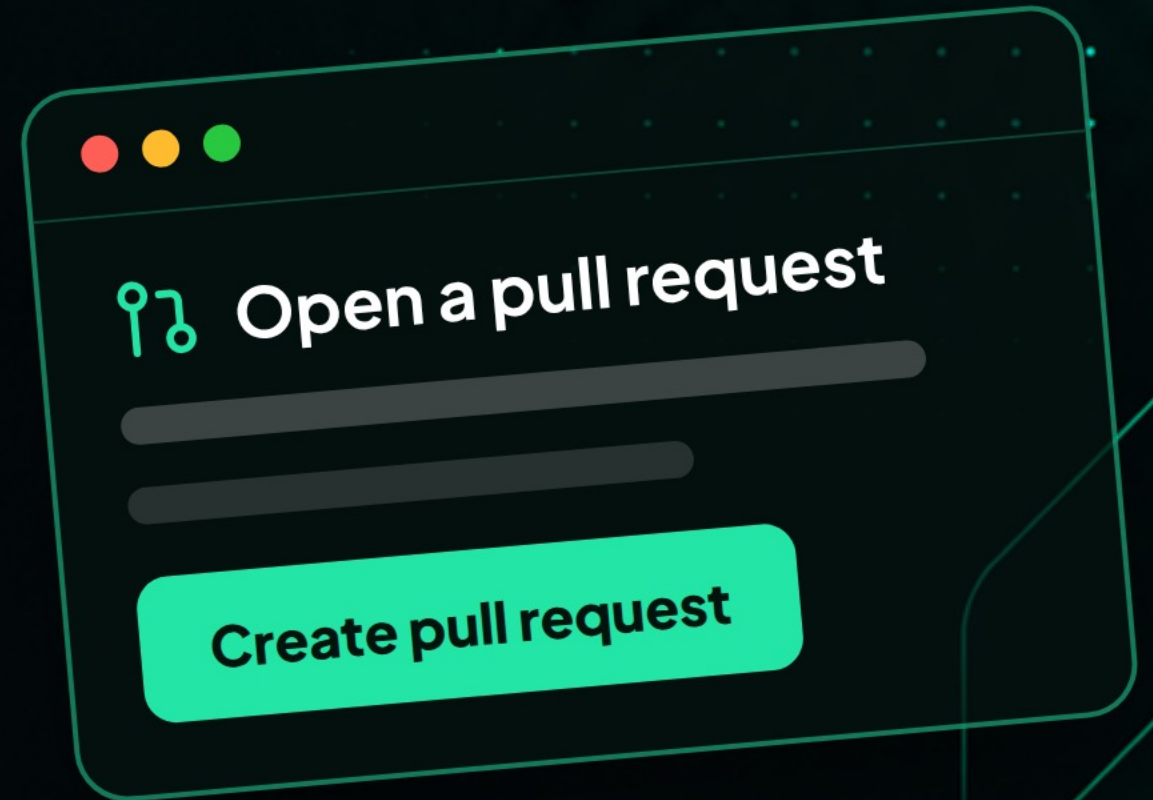

Keep PRs small and clean. No formatting changes or unrelated refactors.

Small, focused PRs are easier to review.

They keep history clean and get merged faster.

*Better
together.*

*Clean code.
Brighter futures.*

03

Code Quality

WRITE CODE WE CAN MAINTAIN.

```
1 function Button({ label }) {  
2   return (  
3     <button className="btn">  
4       {label}  
5     </button>  
6   )  
7 }
```

Before opening your PR:

Follow existing patterns

Keep code consistent with the project.

Keep components reusable

Build flexible, composable parts.

Use consistent naming

Follow the naming conventions.

Avoid extra dependencies

Keep the project lightweight.

Handle edge cases

Think about error states and scenarios.

Remove unused code

Keep the codebase clean and minimal.

Test your changes

Make sure everything works.

Update docs when needed

Help others understand your changes.

Readable > clever.

Write code for humans, not just machines.

*Better
together.*

PR Review

*Better
together.*

A PR ISN'T THE FINISH LINE.

Reviewers may request:

Code changes

Refine implementation or fix issues.

Additional tests

Add or improve test coverage.

Documentation updates

Update docs, comments or READMEs.

Clarification

Provide more context or explanation.

Different approaches

Discuss alternative solutions.

babelize-elements / PR #42

Open

reviewer · 2h ago

Looks good overall! Can you also add a test for this case?

```
- return formatDate(date)
+ return formatDate(date, locale)
```

mohit · 1h ago

Sure! Added the test and updated the docs.

reviewer approved · Looks great!

Merged

Successfully merged.

Feedback is part of contributing.

Be open, be responsive, keep it constructive.

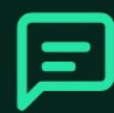

Community Guidelines

BUILD WITH PEOPLE, NOT JUST CODE.

BE RESPECTFUL

Treat contributors and maintainers with respect.

BE CONSTRUCTIVE

Point out problems and help find solutions.

GIVE CONTEXT

Explain your reasoning.

HELP OTHERS

Share what you know.

KEEP IT FOCUSED

Keep discussions relevant.

Good code matters.

Good collaboration matters too.

*Stronger
together.*

06

Star & Fork

SUPPORT THE PROJECT.

*Small actions.
Big impact.*

📖 babelize / **babelize-elements**

UI components for multilingual React + Tailwind apps.
